RE: MBTS Animal Guidelines

Background

The Maritime Beef Testing Society makes every effort to ensure the health and well-being of animals while they are under our care and control. The MBTS has limited physical space as well as limited resources to care for animals beyond the performance testing period. The MBTS also has an obligation to our consignors to promote and market top quality animals through the annual breeding stock sale.

Beyond Capacity Guideline

The MBTS' maximum capacity for the test program is 120 animals, this is based on barn space, feed availability and capacity of the GrowSafe system. In the event of more than 120 animals consigned to the test program, MBTS management will make every effort to ensure that all consignors have access to the program. This may mean that some consignors will be limited to the number of animals they consign. Preference will be given to consignors who have submitted all requested application and supporting forms by the deadline.

End of Test Animal Removal Guideline

Once the performance test period ends, consignors must remove their animals from the premises within 7 days. Any animals remaining at the MBTS past 7 days will be charged at a rate of \$25.00 per day. If any animal remains at the MBTS for a period of 14 days after the end of the testing period, Management reserves the right to recover costs by sale of the animal in a manner it deems appropriate.

Compensation Fund

The Maritime Beef Testing Society makes every effort to ensure the health and well-being of animals while they are under our care and control. Unfortunately, from time-to-time there are instances when animals must be euthanized as a result of an accident. Test Station holds a Compensation Fund, which is designed to help consignors offset some of the financial loss associated with the loss of an animal. This fund is maintained by setting aside \$10.00 from each animal consigned to the testing program.

Compensation Outline

The Test Station will compensate consignors who experience total loss of the value of an animal while participating in the testing program. Compensation is based on the estimated weight of the animal, the previous month average feeder sale for its weight category and any outstanding consignor payable related to the specific animal. The outline of the compensation calculation is as follows:

	Most recent weigh date	Date
A	Animal weight on recent weigh day	Weight Date
B	Animal loss date	# of Days
C	Days past last weigh date	
D	Animal average daily gain (ADG) while on Test	Test ADG
E	Estimated additional gain of animal	B x C
F	Estimated weight of animal on loss date (or reported weight at necropsy)	A + D
G	Previous month average sale price at ASL (weight category)	ASL Avg.
H	Total value of animal	E x F
I	Outstanding fees payable to MBTS	Payable
J	Test feed intake payable	Payable
K	Total Compensation Offer	G - J

Filing a Claim

- A consignor eligible to file a claim under the MBTS Compensation Fund must provide written notice to Board Administration within fifteen (15) days of the loss of the animal

Paying a Claim

- Board Administration will send the compensation offer, based on the formula to the consignor within fifteen (15) days;
- If accepting the compensation offer, the consignor must return the letter of offer within fifteen (15) days to the Test Station office;
- Board Administration has the authority of the Board to pay compensation to consignors who accept the compensation calculation;
- Compensation will be paid within fifteen (15) days of final agreement.
