

The Canadian Sheep Federation Presents:

**Zoom Meeting ID: 894 8265 0389**  
**Passcode: 801202**

In this webinar you will:

- Learn more about GenOvis and how it works
- Understand what breeding values and genetic indexes are and how to use them
- See how to use the mating module to manage inbreeding

**FREE ONLINE WEBINAR:**  
**GenOvis: The Basics**  
**2.9.2021 @ 7PM EST**

GenOvis is an on-farm sheep genetic evaluation program for all Canadian producers (purebred breeders, commercial producers and dairy operators) supported by CEPOQ staff. The program makes it possible to effectively evaluate the genetic value of sheep based on important economic traits as expressed by relatives and other animals within the breed or cross.
